

Big Data for Energy Optimization

The Mary M Gates Learning Center, Alexandria, VA
(10 minutes from D.C.)

Why Attend?

The 2020 Summit is a senior level educational forum that will focus on **optimizing energy management through advanced data capabilities for utilities and C&I facilities and buildings, and institutional campuses**. From near term energy management solutions to help improve efficiencies and asset optimization to advanced applications utilizing analytics, ML and AI for greater automation, insights and performance metrics.

- ✦ RSC professional forums offer you the rare opportunity to truly partake in senior level, in depth dialogue and discussions towards the topics at hand.
- ✦ We bring together a diverse group of leaders, innovators, implementers and end-users to engage in two days of detailed, moderated plenary and panel discussions that are driven by actionable take aways for all in attendance.
- ✦ Seating is limited! Our forum invokes the feel of a 'Town Hall' format (round table seating), where you are offered the ability to help shape the topics at hand by offering your perspective, ideas and questions during the sessions.
- ✦ Ample networking time is built in to both days to allow for you to meet and engage all in attendance in an efficient and effective manner.
- ✦ Join us and walk away with knowledge gained, and collaborations established as leaders in the community come together to build out the near future of big data capabilities for energy optimization.

At RSC, we consider our sponsors as our partners. Our goal is to provide you with an experience that is custom designed to meet your organization's goals. To this end, we value your input and expertise and will work closely with you to create a sponsorship campaign that is tailor made for your business needs.
